JOB OFFER

DEVOPS ENGINEER
(M/F)

THE COMPANY

Nintendo European Research and Development (NERD) is a French subsidiary of Nintendo. We are a company of about 75 employees who share a passion for creating key software technologies and cutting-edge solutions deployed on a wide scale of homogeneous devices. Working in close collaboration with counterparts in Japan and USA, we contribute to emulation, signal processing, content generation, computer vision, machine learning, system development, optimization and security for Nintendo 3DS™, Nintendo Switch™ and other Nintendo platforms. Come discover an engaging and welcoming work environment in the heart of Paris and join our unique team in its mission to put smiles on people’s faces!

POSITION DUTIES

NERD is looking for a DevOps engineer, to work closely with NERD teams and other entities in the Nintendo group. Responsibilities include:

- Management and support of internal applications and associated infrastructure
- Continuous performance and security monitoring, with a focus on integrity, reliability and safety
- Watch and assessment of software technologies, applications and software components that are likely to suit current and future operational needs
- Proposal and development of in-house solutions when suitable
- Deployment, configuration and operation of applications and services used by NERD teams on a day-to-day basis (Source Control Management, Continuous Integration, collaboration tools)

CANDIDATE PROFILE

You are a team player, with a holistic approach to operational topics, a service-oriented mind and good relational skills. You are rigorous, and curious about cutting-edge technologies. You demonstrate autonomous learning capabilities, problem solving skills and lateral thinking. A security-aware mindset is paramount.

You ideally have a Master’s Degree (or equivalent) in Computer Science and experience in software development. The position requires skills in the following domains:

- System administration (network, Active Directory, DNS, DHCP, LDAP/SAML) of common OS (Linux, Windows, macOS) in virtualized or containerized environments (VMWare, Docker, Kubernetes)
- Source Code Management, CI/CD (Jenkins, Nexus) and Configuration Management (Ansible, Puppet)
- System development (Python, Linux / Windows shells, batch, PowerShell, ...)
- Monitoring (Zabbix, Grafana, ELK)
- Administration of corporate collaboration tools (Atlassian Suite)

We expect candidates to be proficient in English, both written and spoken. Knowledge of French and Japanese is appreciated.

ADDITIONAL INFORMATION

This full-time permanent position (CDI) is located in central Paris, France.

Eligibility to work in the EU is required and candidates are expected to relocate near Paris.

CONTACT

If you believe you are the right person for this position, please send a resume and a cover letter to apply@nerd.nintendo.com with PSDVOP2205 in the subject line.
